

IT Security & Risk Management Summit

5th & 6th May, 2010 | Park Hyatt, Melbourne

Supporting Associations

About The Event

In this current technological climate where IT security risks are far more creative and widespread it is critical to your organisation's systems that you are on top of all the latest security issues. 'Cybercrime, Malware incidents, Data breaches and Compliance legislation' and today's changing security landscape means you can't leave anything to chance. The necessity to gain a balanced perspective and the need to separate speculation from fact is critical in making the right security decisions for your systems and protect your organisation from threats, today.

This year's IT Security & Risk Management Summit will be the most comprehensive summit on information security offering all IT professionals a one-stop learning opportunity. The latest trends and technologies, best practices and insight into the practical and pragmatic perspectives on technical and business issues facing organisations today will be covered over two instructive days.

What You Will Learn

The IT Security & Risk Management Summit will offer the opportunity to learn and hear the following themes and topics:

- **Protocol For Lightweight Authentication Of Identity (Plaid) – A Case Study**
- **Advances In Cryptography**
- **Virtualisation And Security**
- **Gaining Executive Support For Your Enterprise Security Strategy Through Business Alignment**
- **Endpoints Updates**
- **Governance, Risk & Compliance**
- **Security in the Clouds**
- **The Top 10 Security Risks To Organisations**
- **Advances In Secure Communications**
- **Network And Information Security (A Case Study)**
- **Hackers & Threats**
- **Applications And Development**

Including an Interactive Panel Discussion:

What Works in a Security Improvement Program?

Who Should Attend

Those charged with developing and implementing their organisation's information security programs, including:

- CIOs
- IT/MIS Staff
- Systems Planners and Analysts
- Systems Administrators
- Software and Application Developers
- Engineers
- Technical and Support Specialists
- Systems Integrators
- Strategic Planners Information Security Managers and Directors
- Information Security Staff
- Network and Systems Security Administrators
- Data Security Professionals
- IT Auditors
- Risk Managers

Benefits of attending

The main reason to attend the IT Security & Risk Management Summit will be to enhance your understanding of the latest trends in information security which will also offer valuable insight for your company.

The event will also offer:

1. Practical solutions. Learn from real-world experts revealing cutting-edge solutions. Put new knowledge and contacts to work the moment you return.
2. Networking. Mix with premier security players from around the world. Build valuable new contacts, talk and connect with colleagues and peers.
